

Getting Started

Records	2 SEALED
File ID	fde61596-5d1b-47bc-be95-b38e75fa2251
Exported	2026-09-27 07:57 UTC

Manifest identity

SHA-256	4c544e6366b96771a110aceea96c73c708fd80a6eb450547c3b38614e1246551
BLAKE3	8ab56d62322c76b73d9c9c9c925c12c1f8b9c251a8a0f68ff6a1808256deab70

How to read this report

Manifest

The exact manifest.json bytes describing this export package and its records.

Record content

Canonical record content. Working properties and original file bytes are separate.

Original source file

Imported file bytes linked to a record. Its display filename is not part of the hash.

Sealed and unsealed

Sealed content matched its stored commitment. Unsealed content has no such commitment.

Quick verification

- 01 Run the package verifier**
From a shell, run `darkroom-verify /path/to/EXPORT-DIRECTORY`.
It checks manifest structure, record content hashes, Sealed commitments, and each included original. It does not verify either PDF.
- 02 Compare the manifest identity**
Compare the verifier's printed manifest SHA-256 and BLAKE3 values with the two values under Manifest identity above. Both values must match.
The verifier also checks the package's included originals/ files against their declared source hashes.
- 03 Interpret the state**
Sealed confirms a stored content commitment. Unsealed confirms internal consistency only.

Records

Google Docs offline warning shown in the 2019 Ink & Switch essay.

Sealed

image Record ccc26556

Record ID ccc26556-a950-4b86-aab8-ec80c9790181
Content version 3
Sealed at 2026-09-27 07:56 UTC

Sealed commitment

Hashes cover the record identity, type, and record content.
